Giroxx GmbH

Member of the INTL FCStone Group

UI-Developer – (m/f/d)

Frankfurt am Main

Permanent employment

INTL FCStone Ltd (“IFL”) is a wholly owned subsidiary of INTL FCStone Inc., a publicly traded company on NASDAQ (INTL). INTL FCStone, including its subsidiaries, provides clients across the globe with a comprehensive array of customised financial services and tools to help them protect their margins and manage volatility. A pioneer in specialised financial services, we open markets for clients underserved by other financial institutions with insight, guidance and transparency.

IFL’s customers include the producers, processors and end users of virtually every major traded commodity; commercial counter-parties; governmental, non-governmental and charitable organizations; institutional investors; brokers; professional traders; commercial banks; and major Investment banks.

IFL is an FCA authorised and regulated firm to provide trade execution, clearing and advisory services focusing primarily on the commodities and foreign exchange sectors. IFL is also registered as a payment services firm in support of its niche Global Payments business.

Job purpose

Seeking a UI-Developer to help support our Global Payments Division.

Primary Responsibilities:

- Conduct testing of completed applications, websites and software to Assess user experience
- Create surveys for research through various social media platforms to gather feedback on user's ease of use and incorporate the findings in the development
- Build storyboards to conceptualize designs and convey project plans to clients and management
- Seek to enhance the user experience by creating seamless navigation through various digital programs and interfaces within the company
- Use coding to develop the aesthetics implemented within a website or product, from the layout menus and drop-down options to colors and fonts
- Combine interface design concepts with digital design and establish milestones to encourage cooperation and teamwork
- Develop overall concepts for improving the user experience within a business webpage or product, ensuring all interactions are intuitive and convenient for customers
- Collaborate with back-end web developers and programmers to improve usability

Knowledge and Experience

- 3-5 years of demonstrated experience in creating and implementing UI development
- Detailed experience with coding and the ability to troubleshoot and analyze websites using HTML, CSS and comparable languages
- Continued education and research into UI development trends and current design strategy and technology
- Professional written and interpersonal skills
- Advanced problem-solving skills and the ability to optimize code for the best possible outcome
- Experience creating code to client's personalized needs and requirements
- Ability to work effectively in a collaborative environment to create top-performing interfaces
- Proficient with visual design programs such as Adobe Photoshop or similar tools

Qualifikation and Skills

- At least 2+ years of professional experience in a leading UI/UX design & innovation agency, or in-house managing large scale projects
- Experience in building one-page applications using Frameworks such as (Angular, React and Flutter e.g.).
- A passion for great work, are eager to design flows and user experiences that are elegant yet simple
- Experience in developing UI pattern libraries and style guides and are well versed in leading mobile UI and Web patterns
- Experience in handling the translation of UI concepts into running digital products / online services (SCRUM-way of working)
- Experience in Design Thinking and hands-on field studies and user research are a plus
- Very strong verbal, written and visual presentation skills in English and German as well as the ability to communicate the value of design within a design and business context
